Portfolio: [IrfanAfifiRomzi](#)

SUMMARY

Software Engineer with experience building and deploying enterprise and IoT-integrated systems across mobile and web platforms. Skilled in backend and full-stack development using NestJS, Spring Boot, React Native, Laravel, and Vue.js, with strong expertise in API development, system integration, AI automation and cloud deployment on AWS.

Experienced in delivering real-world systems including insurance mobile applications, ERP platforms, and IoT monitoring solutions integrated with ESP32 devices. Focused on building scalable, efficient, and data-driven systems for real-time operations and monitoring.

EDUCATION

Multimedia University (Sept 2021 – Oct 2024)

- Bachelor of Computer Science (Honours) majoring in Software Engineering.
CGPA: 3.65

Universiti Malaya (June 2020 – June 2021)

- Foundation in Physical Science.
CGPA: 3.78

PROFESSIONAL EXPERIENCE

Software Engineer II

Evolve Technology Platform Sdn Bhd (March 2026 – Present)

- Designed and optimized databases using MySQL.
- Deployed and managed applications on AWS cloud infrastructure.
- Integrated RFID/EPC and ESP32-based IoT devices for real-time data collection and monitoring.
- Collaborated with cross-functional teams to deliver end-to-end solutions.

Junior Software Engineer

Evolve Technology Platform Sdn Bhd (Feb 2025 – March 2026)

- Developed and maintained enterprise applications across mobile, web, and IoT-integrated systems.
- Built scalable backend services using Spring Boot and NestJS.
- Developed cross-platform mobile applications using React Native.
- Created admin dashboards and monitoring systems using Vue.js.

PETRONAS Intern

Petroleum Nasional Berhad (July 2024 – October 2024)

- Updated Microsoft Excel and assisted team in maintaining Power BI dashboards for various business portfolios, ensuring accurate and up-to-date data visualization for P4R 2024-2029.
- Assisted in extracting Budget Transfer for all 9 pillars and 3 enablers in the department.

PROFESSIONAL PROJECTS

HAPPI Malaysia Insurance Mobile Application

- Developed mobile application features using React Native and Vue.js.
- Built backend APIs using Spring Boot.
- Developed admin panel using Vue.js.
- Successfully deployed on Google App Store and Apple App Store.

Zora Pro ERP System

- Developed ERP system covering warehouse, manufacturing, and reporting modules.
- Built backend services using NestJS.
- Integrated RFID/EPC technology for automated stock tracking.
- Developed admin dashboard for real-time monitoring and management.

FrostEdge Smart Freezer Monitoring System

- Developed internal web-based admin system to monitor smart freezer conditions in real-time.
- Integrated ESP32 sensors to collect temperature and freezer status data.
- Built backend services to process and store sensor data for monitoring and alerts.
- Designed dashboard for real-time visualization and system status tracking.
- Implemented alert notifications via Telegram and email (optional).

SKILLS & LANGUAGES

Programming

- PHP - Laravel
- JavaScript & TypeScript – React.js, Vue.js, NestJS, React Native
- Java – Spring Boot
- Dart – Flutter

Database

- MySQL

Deployment & Platforms

- AWS, Huawei Cloud
- Google Play Store, Apple App Store

Tools & Software

- Microsoft Office (Word, PowerPoint – Advanced; Excel – Intermediate)
- Power BI

Languages

- Malay (Native)
- English (Intermediate – written and spoken)
